

Lesson 07

IT Communication Practice

Role-Play

Scenario: An employee, Sarah, is having trouble connecting to the internet. She calls IT support, where Jake, an IT technician, helps her resolve the issue.

Sarah: Hi! This is Sarah from Marketing Department. I'm having a connectivity problem. I can't access the internet.

Jake: Hi, Sarah. Let me walk you through the steps to check the issue. First, have you tried restarting your computer?

Sarah: Yes, I already did, but still not working.

Jake: Okay. This seems to be a configuration issue. Let's check your Wi-Fi settings and see if you're connected to the correct network?

Sarah: Oh, I see now. It was connected to the wrong network. Let me switch it... Yes, it's working now!

Jake: Great! If the issue happens again, try restarting your router. If it continues, I'll escalate this to the IT department for further troubleshooting.

Sarah: Got it. Thank you for your help.

Jake: No problem. Have a great day!

Role-play Analysis

1. What problem is Sarah experiencing?
2. What is the first step that Jake asks Sarah to do?
3. What was the actual cause of the problem?
4. What phrase does Jake use to explain that the issue might be related to settings?
5. What does Jake offer to do if the problem happens again?

Discussion

Have you ever faced a similar IT issue at work? How was it resolved?

Practice

Matching Activity (Wordwall Game)

Link: <https://wordwall.net/resource/88449584>

Instructions: Match the vocabulary in **COLUMN A** with its correct definition in **COLUMN B**.

COLUMN A	COLUMN B
1. Install	A. Restart a device to fix an issue.
2. Upgrade	B. Report a problem to a higher authority or specialized team.
3. Technical Issue	C. Improve or update software or hardware to a newer version.
4. Reboot	D. Set up software or hardware.
5. Connectivity problem	E. A problem related to computer systems, software, or hardware.
6. Escalate the issue	F. Difficulty in establishing an internet or network connection.

Stressed Syllables

Practice pronouncing these words with the correct stress:

1. configu**R**ation
2. instal**L**ation
3. **E**scalate
4. **TROU**bleshooting
5. authenti**C**ation

Production

Instructions:

- **Pair-up**
- One of you is **IT support technician** and the other is the **employee with a technical issue**.
- You will be given a different IT issue using the colorwheel.
- The IT technician must ask questions and help troubleshoot the issue.
- At the end, each pair presents their conversation in class.

IT issues:

1. Software Installation Problem
2. System Upgrade Required
3. Internet Connectivity Issue
4. Computer Not Responding
5. Escalating a Major Issue

Discussion

1. What was the most challenging part of the conversation?
2. How can you improve your IT communication skills?
3. What new vocabulary did you use?

Key Vocabulary

Word/Phrase	Use	Example
Teamwork	Refers to working together to achieve a goal.	<i>Successful projects depend on teamwork and good communication.</i>
Corporate Culture	The values, beliefs and behaviors that define a company's work environment.	<i>Our corporate culture promotes innovation and open communication.</i>
Quality Service	The expectations and requirements of customers regarding a product or service.	<i>Our company focuses on understanding customer needs to improve our services.</i>
Supportive	Used in providing encouragement and help to others.	<i>Our team is supportive and always willing to assist each other.</i>
Innovation	The process of introducing new ideas, methods, or products.	<i>We encourage innovation to stay competitive in the market.</i>

Wrap-Up

“Technology is powerful, but clear communication makes it even more effective.”

Do you agree? Why or why not?
